A Guide to Civil Procedure in Hong Kong – Fifth Edition

Authors: Michael Wilkinson, Eric Cheung, Gary Meggitt
Published: 2014
ISBN: 9789888300242
Price: HK\$ 1,590
Format: Hardcover book

The principal aim of this book is to provide practitioners with a clear and up-to-date exposition of the rules and judicial decisions governing the conduct of civil litigation in Hong Kong.

The Civil Justice Reform has now been effective for more than 5 years and there are many decisions reflecting judicial approaches and attitudes to the implementation of the new rules. The jury is, however, still out as to whether the Reforms have significantly achieved their objectives.

The authors have chronicled these developments by reference to the considerable amount of case law on the new rules and Practice Directions. The fifth edition includes the most significant new cases affecting both the new rules and rules unaffected by the Reforms. The WTO in Geneva acts as the institutional umbrella for these and other agreements. The aim of this book is to outline the origins, purpose and scope of the individual agreements, as well as to examine how they function institutionally.

Additionally, this book explores the developments that the relevant laws and practices have undergone over the years. In recent times, the WTO has become the subject of wide-ranging criticisms, the causes and effects of which are also studied. This book serves as a tool in accessing the current world trading system for students, practitioners and laypersons alike.

Autonomy and Protection of Fundamental Rights in the Hong Kong Special Administrative Region

Author: Yun-Bor Wong
Published: 2007
ISBN: 9789628937578
Price: HK\$ 580
Format: Softcover book

The question of whether Hong Kong is an autonomous region independent of the PRC or an internal administrative region of the PRC is not straightforward. The answer is particularly unclear when it comes to the practical protection of fundamental rights.

This book explores the legal structure of the HKSAR, including its constitutional and international status, and analyses the legal meaning of "one country, two systems". It focuses on the issues of self-determination and the protection of the rights of the people of a territory who have transferred from one state to another with reference to international treaties and the provisions of a national constitution.

This is one of the first studies to comprehensively review the legal problems arising from Hong Kong's transition and the first book to systematically analyse the legal meaning of the "autonomy" currently practiced in Hong Kong. It will be a significant contribution to the further understanding of international law and Chinese constitutional law.

Offering a detailed dissertation on the fundamentals of the HKSAR legal system, this book will be valuable to barristers, solicitors, academics and students engaged in the practice or study of constitutional or human rights law and practice. It will also be of great interest to all people concerned with the legal realities of collective and individual rights in Hong Kong.

Ho & Hall's Hong Kong Contract Law - Third Edition

Authors: Betty M Ho, Stephen Hall

Published: 2013

ISBN: 9789888231423

Price: HK\$ 1,500

Format: Softcover book

Hong Kong has been institutionally separated from the United Kingdom for less than two decades. As recently as 25 years ago, it would have been difficult to perceive any appreciable emergence of a distinctly local Hong Kong common law. There were, however, some relatively early signs that the Crown Colony's common law was adapting to Hong Kong conditions to better serve the local community. Professor Betty M Ho skillfully identified many of these earlier developments.

Since the publication of the second edition of this book almost 20 years ago, there has been an acceleration in the pace at which the common law in Hong Kong has developed distinctly local characteristics. The law of contract is no exception in this regard. The approaching end of British sovereignty had much to do with this development during the earlier part of the 1990s. Since the foundation of the Hong Kong SAR, a principal impetus has been the work of the new Court of Final Appeal which was established to replace the Privy Council as the highest court for the territory. The localisation of Hong Kong's highest court has contributed, and will almost certainly continue to contribute, significantly to the emergence of a Hong Kong common law.

This overdue third edition of Professor Ho's work on contract law builds on her legacy and makes a contribution to the further emergence of a Hong Kong common law of contract. For the legal practitioner, this book will serve as a reference tool, and for the student commencing legal studies it will provide a general introduction to the basic principles of Hong Kong contract law and serve as a basis for more advanced studies.

Published: 1997
ISBN: 9780409998719
Price: HK\$ 1,290
Format: Softcover book

This is the first text to offer the reader an in-depth analysis of the principles of Hong Kong company law coupled with a comprehensive collection of relevant case law from the Hong Kong courts. Author: Simon Luk
Published: 2016
ISBN: 9789888359790
Price: HK\$ 1,800
Format: Softcover book

Private M&A in Hong Kong details the sale and purchase of shares, one of the most common forms of corporate acquisition in the territory. By acquiring part or all of the share capital of a target company, the investor can exercise control over the target company as well as its businesses and assets. Many parties tend to opt for sale of shares over sale of assets because they are simpler and more straightforward. However, as the subject of the transaction involves shares in the target company, parties should carefully consider certain common legal issues when structuring a share acquisition. Private M&A in Hong Kong includes practical examples and explanatory notes to exemplify the procedures and issues in private M&A investments, and illustrates the key considerations involved in such transactions. This book will be a good resource for anyone seeking to understand the main issues, common procedures and documentation involved in private M&A transactions in a common law jurisdiction.

Authors: Grenville Cross SBS, SC, Patrick W.S. Cheung
Published: 2015
ISBN: 9789888300662
Price: HK\$ 2,500
Format: Hardcover book

The seventh edition of *Sentencing in Hong Kong* is an essential work of reference. Recent developments in the law, practice and procedure of sentencing are incorporated, and issues are considered in a practical way. The impact of new legislation is explained, and the latest sentencing guidelines and tariff judgments are included. The factors which aggravate and mitigate sentence have been expanded, and the text as a whole has been modernised. The Appendix contains the cases on quantum of sentence, and it has been expertly expanded for the reference of courts and counsel. The effect on sentencing of appellate judgments is examined, and the text throughout is both analytical and practical. Whilst the focus is on local case law, jurisprudence from elsewhere is referenced where this assists an appreciation of the point in issue.

"In the Foreword to the Sixth Edition, Patrick Chan, formerly a Permanent Judge of the Court of Final Appeal, said: 'To indulge in making comparison with other cases but to overlook the fundamental sentencing principles would be missing the whole object of sentencing'. I agree fully with those words. When I first joined the Court of Appeal and began dealing with criminal cases after a gap of over 20 years and having to look closely at sentences (in some cases fixing sentencing tariffs), this textbook provided invaluable guidance to me. Like many judges and practitioners, I am grateful to the authors for producing this excellent work." - Foreword to the seventh edition by Geoffrey Ma, Chief Justice, Court of Final Appeal

Private Mergers and Acquisitions in Hong Kong

Author: Simon Luk
Published: 2016
ISBN: 9789888359790
Price: HK\$1,800
Format: Softcover book

Private Mergers and Acquisitions in Hong Kong details the sale and purchase of shares, one of the most common forms of corporate acquisition in the territory. By acquiring part or all of the share capital of a target company, the investor can exercise control over the target company as well as its businesses and assets. Many parties tend to opt for sale of shares over sale of assets because they are simpler and more straightforward. However, as the subject of the transaction involves shares in the target company, parties should carefully consider certain common legal issues when structuring a share acquisition. Private M&A in Hong Kong includes practical examples and explanatory notes to exemplify the procedures and issues in private M&A investments, and illustrates the key considerations involved in such transactions. This book will be a good resource for anyone seeking to understand the main issues, common procedures and documentation involved in private M&A transactions in a common law jurisdiction.

The Law of Unjust Enrichment in Hong Kong

Author: Clemence Yeung
Published: 2008
ISBN: 9789628972265
Price: HK\$1,350
Format: Hardcover book

The law of unjust enrichment is the least known and understood area of the law of obligations. The subject has in the last two decades attracted immense attention in England where there have been very many significant developments, both in terms of the seminal judgments which have emerged and the continued exploration of, for instance, the juridical basis of the concept of unjust enrichment on the academic front. There is also the difficult problem of proprietary restitution which has taxed both the courts and the commentators.

The present book considers both the Hong Kong and English case law, and draws upon academic discussions as to its interpretation. It contains, in the chapter on Historical Introduction, a helpful description of the legal history relating to the money counts, a good grasp of that history being essential to understanding the present law. It also considers the influence of civil law, which has been considerable and is not to be overlooked. Civilian learning had caused one of the most distinguished and important writers on the law of unjust enrichment to recant much of his earlier thinking on the subject, although thus far the case law has continued to progress using the recanted model which he had advocated.

The book is intended to be of use to both practitioners and students.

Autonomy and Protection of Fundamental Rights in the Hong Kong Special Administrative Region

Author: Yun-Bor Wong
Published: 2007
ISBN: 9789628937578
Price: HK\$ 580
Format: Softcover book

The question of whether Hong Kong is an autonomous region independent of the PRC or an internal administrative region of the PRC is not straightforward. The answer is particularly unclear when it comes to the practical protection of fundamental rights.

This book explores the legal structure of the HKSAR, including its constitutional and international status, and analyse the legal meaning of "one country, two systems". It focuses on the issues of self-determination and the protection of the rights of the people of a territory who have transferred from one state to another with reference to international treaties and the provisions of a national constitution.

This is one of the first studies to comprehensively review the legal problems arising from Hong Kong's transition and the first book to systematically analyse the legal meaning of the "autonomy" currently practiced in Hong Kong. It will be a significant contribution to the further understanding of international law and Chinese constitutional law.

Offering a detailed dissertation on the fundamentals of the HKSAR legal system, this book will be valuable to barristers, solicitors, academics and students engaged in the practice or study of constitutional law and practice. It will also be of great interest to all people concerned with the legal realities of collective and individual rights in Hong Kong.

Cyberlaw in Hong Kong is essential reading not only for lawyers, but anyone connected with the web. The third edition of this popular title includes the latest amendments to the Personal Data (Privacy) Ordinance (Cap 486), with the chapter completely rewritten and includes a chart setting out the complex criminal regime that has been implemented. The Ordinance regulates the sale of personal data in direct marketing, creates a new offence for disclosing personal data without consent and imposes heavier penalties. A discussion on the landmark decision of *Shi Tao v Privacy Commissioner* for Personal Data is also extensively discussed, among other cases. This book also includes the modifications to the Copyright Ordinance (Cap 528) and the largely amended Trade Descriptions Ordinance (Cap 362) that affects advertising law on the internet.

Defamation is another area of law that has seen an influx of cases in relation to the internet, especially in the UK, where the courts are recognising that messages on the internet are much more likely to 'go viral' than those sent through traditional media. There are also developments in the UK relating to the contentious area of 'metatags' and their relationship with trade mark law that are dealt with in this book, as those decisions will have great influence in Hong Kong. Cyberlaw also looks at China and the internet with the first-to-file principle of the trade mark law now overhauled. It also takes into account cybersquatting and how the courts are prepared to deal with the matter, even from foreign companies.

International and Comparative Intellectual Property: Law, Policy and Practice (Bilingual Edition)

Author: Li Yahong
Published: 2005
ISBN: 9789628855117
Price: HK\$ 460
Format: Softcover book

The rapid advances of the technologies and the globalisation of world economy have changed the landscape of intellectual property law from territorial to international.

Intellectual property lawyers and academics are increasingly forced to master the vast amount of international intellectual property treaties/agreements/conventions to assess their domestic intellectual property laws, and to deal with international registration, negotiation, enforcement and arbitration of intellectual properties.

They are also required to be familiar with foreign intellectual property laws to better represent their clients doing businesses in another country.

This book intends to provide intellectual property policy makers, practitioners, scholars and students, particularly those who are in the greater China area, with a comprehensive yet concise introduction of the most updated intellectual property law and practices from international and comparative perspectives, with special references to US, EU and China (including Hong Kong).

The book introduces the major multilateral IP conventions/agreements such as TRIPs, the international IP bodies such as WIPO, the regional and bilateral agreements such as various EU Directives, and examines how various forms of intellectual property operate within the international framework and at national level.

The book also discusses the international enforcement measures and TRIPs dispute resolution mechanisms, including discussion on the most updated cases.

While devoting special attention to IPRs protection for cutting edge technologies such as biotechnology and information technology, the book also addresses the importance of protection for indigenous resources such as biodiversity, traditional knowledge and folklore, and the overall implications for global competition between the developed and the developing countries.

The book closes with a summary of the post-TRIPs development of the international intellectual property system.

Intellectual Property in Hong Kong

Authors: Michael D Pendleton, Alice Lee
Published: 2007
ISBN: 9789628972296
Price: HK\$ 580
Format: Softcover book

Unlike most of Asia, the Hong Kong SAR has as long a history and immersion in intellectual property as any country of Western Europe or the United States. This, of course, is due to the influence of the United Kingdom during its period as coloniser. As a result, Hong Kong's intellectual property laws are rich and diverse as well as being heavily biased in favour of the right holder. Indeed Hong Kong, which is a member (the only non-sovereign state member) of the World Trade Organisation (WTO), was the first member of the WTO to seek TRIPs compliance for its intellectual property laws. In addition to the complexity of its intellectual property statute law, the judge made law, ie. the common law of IP, is equally rich and diverse. The mix of judges both local and expatriate has resulted in a highly comparative approach to intellectual property law, and one that is accessible as it is in the English language.

There is a need in Hong Kong for a concise but critical analysis of intellectual property law and this book aims to fulfill this need. It will particularly be of use to students of intellectual property.

Marketing Professional Services in Asia

Author: Robert C. Sawhney
Published: 2009
ISBN: 9789888016310
Price: HK\$ 530
Format: Softcover book

Marketing is crucial to the success of any firm, and this has been demonstrated time and time again through research in a wide variety of industries, including professional service firms (PSF). Unfortunately, what has been written for the PSF is either western based or fails to account for the unique nature of such firms.

This book is different. It addresses strategic marketing issues directly from the perspective of the Asian PSF by drawing on research and methodologies that are rooted in the context of the Asian professional service provider. There are numerous cases and insights taken from the Asian market which will provide the reader with relevant, actionable advice. Additionally, a number of models have been developed whereby practitioners can take these concepts and apply them within their own firm. Whilst marketing has come along way in terms of acceptance and application in the western PSF, there is a long way to go in Asia in terms of practicing professionals understanding and acceptance of marketing.

Marketing is not about advertising and promotion. It is a lens with which to view your firm and understand that servicing and satisfying clients is what any firm is supposed to be doing. Professionals must change their traditional insular view of practice and realize that in today's competitive business environment, creating a firm which is client focused and differentiated is the only way to ensure superior performance. Marketing, as it is meant to be, provides you with the mind set and methodology to be client driven and innovative.

Covering a wide range of issues such as marketing culture, strategy, branding, and pricing, this book is for practicing professionals and PSF marketers, those at the top of the firm who have ultimate responsibility for the strategic direction and performance of the firm. There are also chapters written specifically for the small PSF which take into account the unique nature of small firm management.

"Anyone who has had to organize or implement strategic planning initiatives within a professional services firm will have been looking long and hard for a book such as this, not only as a suitable roadmap for what they need to undertake, but also as a concise reference book which will explain to their recalcitrant partners why the entire firm, and not just a few Rainmakers and marketing professionals, have to be involved in the process and the end product." Peter Aherne, former partner - Deacons, Hong Kong

"A comprehensive, well written, and accurate presentation of law firm marketing" Bruce W. Marcus, Consultant and Editor, The Marcus Letter

"This book is a 'must read' for Marketers as well as Executives in Professional Service Firms in Asia and beyond" Geoff Trotter, Chief Knowledge Officer, Ernst & Young Far East Area

"I believe that this is one of the most indigenous works so far on marketing in Asia. I highly recommend this book as I believe it is definitely an eye-opener" Professor Oliver Yau, Chair Professor of Marketing, City University of Hong Kong

A Guide to the World Trade Organisation

Authors: Richard Senti, Hans Mahncke
Published: 2008
ISBN: 9789628972593
Price: HK\$ 265
Format: Softcover book

The establishment of the World Trade Organisation (WTO) in 1995 meant both a continuation and a reorientation of the post-war world trade order. While the basic principles governing world trade, as well as laws relating to trade in goods (GATT), were maintained, the existing system was expanded with the inclusion of trade in services (GATS) and laws on the protection of intellectual property rights (TRIPs). The WTO in Geneva acts as the institutional umbrella for these and other agreements. The aim of this book is to outline the origins, purpose and scope of the individual agreements, as well as to examine how they function institutionally.

Additionally, this book explores the developments that the relevant laws and practices have undergone over the years. In recent times, the WTO has become the subject of wide-ranging criticisms, the causes and effects of which are also studied. This book serves as a tool in accessing the current world trading system for students, practitioners and laypersons alike.

The Professional Conduct of Lawyers in Hong Kong - Desk Edition 2014

Authors: Michael Wilkinson & Michael Sandor
Published: 2014
ISBN: 9789888231805
Price: HK\$1,000
Format: Softcover book

This new edition is entitled a Desk Edition as we recognise that the range of material and of discussion since the introduction of the first Student Edition in 1996, has necessarily expanded and deepened far beyond a 'beginners' text, and that our past 'students' carry the book with them into practice.

In considering its usefulness for practitioners, the book provides in one volume, up-to-date information, discussion and analysis of practice and principle, for solicitors, barristers, the judiciary, government lawyers, prosecutors, in-house counsel, foreign and overseas lawyers and students.

Given the scattering of sources available in Hong Kong, it is clearly desirable to have a cohesive and portable text that provides both overview and detail as well as connections and comment which are useful to the practitioner and the student.

Professional responsibility issues have multiplied and become more finely tuned with the expansion of legislation and regulation of legal practice here and overseas. Legal practice itself has become entwined with a great variety of governmental, social and corporate regulation, locally and internationally. Consequently, practitioners have had to become particularly sensitive to the interplay of regulation with professional responsibility considerations when taking up the task of advising and representing clients.

As before, this book incorporates relevant decisions and comment from other jurisdictions. We hope that this book will assist the practitioner in being alert to current and impending responsibility issues when asked for advice and assistance. We hope that it will assist practitioners in understanding and maintaining the high standards of conduct that the Hong Kong legal profession expects of its members.

The Law of Tort in Hong Kong - Third Edition

Authors: DK Srivastava, Anna Lui, Charu Sharma, Sara Tsui
Published: 2014
ISBN: 9789888231591
Price: HK\$ 2,000
Format: Softcover book

The Law of Tort in Hong Kong, first edition, was one of the first local textbooks on tort law. Now in its third edition, it still offers a unique local perspective on tort law, separate to the English common law, as referring to laws of England does not always offer answers to problems unique to Hong Kong. This book aims to explain the legal principles of the law of tort through the lens of and with particular reference to Hong Kong cases and legislation. Leading cases on the law of tort are analysed and relevant legislation examined. The authors also discuss Hong Kong socioeconomic developments and suggest options for law reform. Distinctive of other works from England or elsewhere in the Commonwealth, this book focuses on typical Hong Kong problems such as nuisance, trespass, occupiers' and owners' liability and liability of bank and financial advisers. This core text is of value and interest to lawyers, law lecturers and students.

Wang's Business Law Of China - Fourth Edition

Author: Rohan Price
Published: 2014
ISBN: 9789628105953
Price: HK\$ 1,350
Format: Softcover book

Wang's Business Law of China, the first work of its kind on Chinese commercial law, is a detailed, analytical, comprehensive and practical account of the subject. It examines and discusses how Chinese laws are made, why they are made, how they are interpreted and enforced, and their effects on the development of the market economy in China as well as on foreign businesses doing transactions with their Chinese counterparts or making investments in China.

The book comprises 24 chapters set out in six parts, with full discussions and analysis on all the key topics of commercial law in China, such as the system of law-making and law interpretation, contract law, company law, laws relating to foreign investment such as Chinese-foreign equity joint ventures and contractual ventures, and laws relating to state-owned enterprises and other Chinese entities, foreign trade, provisions and practice relating to the fair trading system such as antidumping, subsidies and countervailing duties and safeguards, central and commercial banks, securities, intellectual property and dispute resolution. As well as carefully selected cases, writings and commentaries by Chinese and non-Chinese authorities are also covered to explain the various aspects of Chinese business law. On each of the topics, this author has also provided his own views based on an analysis of the law and its implementation. This is particularly so with regard to those topics on which there are yet no leading cases or authorities.

Since the first edition, and indeed since the previous edition, many changes have taken place in China which have impacted on commercial law. Changes have resulted both from domestic reforms and China's integration into the world economy. Domestically, the legal system has been reformed by the adoption of the Legislative Law, provided powers at various levels of government and created procedures for making laws, national and local. This is covered in detail. Globally, China's accession to the WTO in November 2001 has made broader trading rights into a reality. For more than half of a century after the establishment of the People's Republic of China, individuals and enterprises were not entitled to conduct foreign trade. The fourth edition incorporates all the developments brought about by WTO obligations, comprising numerous laws and regulations in connection with trade in goods, trade in services, foreign investment, intellectual property protection, antidumping, subsidies and countervailing duties, safeguards and taxation.

This book is designed to meet the needs of the legal academic, the practitioner and business person interested in or doing business with or in China. It is also particularly suitable for law students studying Chinese civil and commercial law and law on international business transactions.
